

Q1: MITAO permits the definition of a visual workflow which embeds various automatic text analysis operations (e.g. topic modeling).

The backend of MITAO uses **popular python libraries**.

For text analysis operation it mainly uses two popular libraries: **NLTK and Gensim**.

The front end interface ...

Q2: with MITAO users have complete control over the definition and configuration of a workflow according to their use case and input data – **tools, data, and parameters.**

Q3: MITAO allows the elaboration of any textual corpus regardless of:

- **domain** (e.g. “history”, “philosophy”, etc),
- **type** (e.g. newspapers, articles, etc),
- **language** (e.g. English, Italian, etc)

Workflow example ...
